PROFESSIONAL SUMMARY

B.Tech graduate in Artificial Intelligence and Data Science (2026) with internship experience shipping end-to-end machine learning pipelines, NLP applications, and full-stack AI systems. Proficient in Python, SQL, TensorFlow, and PyTorch, with hands-on exposure to LLMs, RAG, and MLOps tooling (FastAPI, Docker, MLflow). Seeking an entry-level AI/ML, Data Science, Data Analytics, or Data Engineering role to apply rigorous experimentation and deployment skills to production problems.

TECHNICAL SKILLS

Programming & Databases: Python, SQL, Java, MongoDB, PostgreSQL

Machine Learning: Scikit-learn, Feature Engineering, Model Evaluation, Supervised & Unsupervised Learning, Time Series Forecasting, Hyperparameter Tuning

Deep Learning & Generative AI: TensorFlow, PyTorch, Keras, CNNs, Transfer Learning, NLP, NLTK, LLMs, RAG, LangChain

Data Analysis & Visualization: Pandas, NumPy, Power BI, Tableau, Matplotlib, Seaborn, Plotly

Data Engineering: Apache Spark, ETL, Data Preprocessing, Data Pipelines

MLOps & Deployment: FastAPI, Streamlit, Docker, Kubernetes, MLflow, REST APIs, Azure

Tools: Pinecone, Git, GitHub, Jupyter Notebook, Hugging Face, Flask

EXPERIENCE

AI Engineer Intern | DataMites, Coimbatore

May 2026 – Aug 2026

- Built and deployed end-to-end machine learning pipelines for prediction tasks — data preprocessing, feature engineering, model training, and evaluation — using Python, Pandas, and Scikit-learn.
- Improved model performance through systematic cross-validation and hyperparameter tuning, benchmarking candidates on Accuracy, Precision, Recall, and F1-score before selecting the production model.
- Collaborated within a cross-functional ML team, applying reproducible experimentation practices to iterate on model candidates quickly.

AI Engineer Intern | Code Clause (Remote)

Feb 2025 – Mar 2025

- Designed and deployed an NLP-based movie recommendation chatbot using Python, NLTK, and Streamlit, applying regex-based intent recognition to interpret natural-language queries.
- Built a real-time, user-focused conversational interface translating raw text input into structured recommendations.

PROJECTS

Smart AI Library Management System | Python, FastAPI, SQLAlchemy, SQLite, JavaScript

- Architected a full-stack AI-powered library management platform automating book cataloging, transactions, and fine calculation via a FastAPI/SQLAlchemy backend.
- Engineered ML modules for book recommendations, demand forecasting, overdue-risk prediction, and inventory restocking — extending the system from CRUD into predictive decision support.

NBA Shot Selection Prediction | Python, Scikit-learn, Pandas, NumPy

- Performed EDA and feature engineering on NBA shot data, then trained and compared multiple classification models, selecting Logistic Regression as the top performer by Accuracy, Precision, Recall, F1-score, and confusion matrix analysis.
- [final accuracy : 70 % and F1 score : 58%]

Loan Prediction using Machine Learning | Python, Scikit-learn, Pandas, NumPy, Streamlit

- Built a predictive loan-approval system, applying data preprocessing, feature engineering, and model optimization to applicant data.
- Benchmarked multiple classification models on Accuracy, Precision, Recall, F1-score, and ROC-AUC, then deployed the top model as a real-time Streamlit application.
- [final 82% ROC-AUC]

EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science

2022 – 2026

CMS College of Engineering and Technology, Coimbatore

CERTIFICATIONS

- Certified Data Science — DataMites (2026)
- Certified AI Engineer — DataMites (2026)
